DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed July 12, 2010 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.
2. Note that the English language abstract, while required for consideration, does not remove the requirement to provide a complete copy of the original foreign language document.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claim 36 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 36 is a computer program. Note that the term "apparatus" is not necessarily a physical apparatus (for example the apparatus of government). Therefore since the instant disclosure indicates that the invention may comprise software, the claim does not distinguish over a software only interpretation. see for example paragraph 84 of the Pre Grant publication 2004/0147275.

Per MPEP 2106.01:

Data structures not claimed as embodied in computer-readable media are descriptive material per se and are not statutory because they are not capable of causing functional change in the computer. See, e.g., *Warmerdam*, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory). Such claimed data structures do not define any structural and functional interrelationships between the data structure and other claimed aspects of the invention which permit the data structure's functionality to be realized. In contrast, a claimed computer-readable medium encoded with a data structure defines structural and functional interrelationships between the data structure and the computer software and hardware components which permit the data structure's functionality to be realized, and is thus statutory.

5. Claims 37 and 38 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 37 and 38 are not limited to tangible embodiments. Note that the term "device" is not limited to a physical device (for example "a plot device"). In view of Applicant's disclosure, as shown in the specification in paragraph 88 where the instructions could be received from a remote storage device through I/O devices (note that paragraph numbering refers to the numbering of the Pre-Grant Publication of the instant application: 2004/0147275). Thus the medium could include transmission media such as acoustic, optical or electromagnetic waves. As such, the claim is not limited to statutory subject matter and is therefore non-statutory. (See 1300 OG 142: Interim

guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility; Annex IV (c), published 22 November 2005).

6. **Note:** An OG notice has been released to guide applicants in rewriting claims to overcome rejections based on non-statutory "computer readable media". In order to be directed to statutory subject matter, the claim must be directed to a **non-transitory** computer readable medium storing the computer program.

The phrase non-transitory need not appear in the specification, however, if the specification DOES include a definition of the term "non-transitory", it should not include transitory elements.

The limited situations in which such an amendment could raise issues of new matter occur, for example, when the specification does not support a non-transitory embodiment because a signal per se is the only viable embodiment such that the amended claim is impermissibly broadened beyond the supporting disclosure.

Allowable Subject Matter

7. Claims 1, 5-14, 18-25, 39-35 are allowed for the reasons presented in the previous action.

Conclusion

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew D. Anderson can be reached on 571-272-4711.

9. The central fax phone number for the Office is 571-273-8300.

Most facsimile-transmitted patent application related correspondence is required to be sent to the Central FAX Number.

CENTRALIZED DELIVERY POLICY: For patent related correspondence, hand carry deliveries must be made to the Customer Service Window (now located at the Randolph Building, 401 Dulany Street, Alexandria, VA 22314), and facsimile transmissions must be sent to the Central FAX number, unless an exception applies. For example, if the examiner has rejected claims in a regular U.S. patent application, and the reply to the examiner's Office action is desired to be transmitted by facsimile rather than mailed, the reply must be sent to the Central FAX Number.
